Backend engineer: APIs, databases, and distributed services in Java, Python, Rust, and PHP — from data model to deployed cloud system.

Profile

Backend engineer building APIs, databases, and distributed services across Java, Python, Rust, and PHP. I design data models — including scientific (lipidomics) databases — build async and high-throughput services, and deploy to cloud and HPC infrastructure.

Technical Skills

Languages	Java, Python, Rust, PHP, SQL, Bash
Backend & APIs	REST and async services (FastAPI, async Rust / tokio); microservices; high-throughput data services; structured logging and observability
Databases	Relational / SQL design (incl. lipidomics databases); scientific stores (HDF5, Parquet); query and pipeline optimisation
Distributed & cloud	AWS, Firebase; Docker, Kubernetes; Ray, Dask; SLURM / HPC
Practices	Reproducible pipelines; benchmarking; clean modular architecture

Experience

2021–present	Independent Backend & Software Engineer, Bitspark GmbH Designed and built backend services, databases, and distributed systems in Rust, Python, and related stacks; deployed to cloud and HPC; documented and open-source.
2019–2021	Data Infrastructure & Pipelines, Technische Universität München, Munich Database-backed analysis and high-throughput pipelines at HPC scale (SLURM); >100 GB datasets. Taught at Master's level.
2017–2018	Data Pipelines & Storage, Universitätsklinikum Hamburg-Eppendorf, Hamburg Automated high-throughput data-processing pipelines and storage.

Selected Projects

purpose	Rust backend (Cargo workspace) — async (tokio), HTTP services, structured logging, trait-based extensible architecture. github.com/fullscreen-triangle/purpose
four-sided-triangle	Python (FastAPI) backend with a Rust core; Ray, Docker; resource-aware orchestration. github.com/fullscreen-triangle/four-sided-triangle
Lipidomics databases	Designed and built relational databases for lipidomics data — schema, ingestion, and query.
lavoisier	Distributed data-processing backend; 98.9% NIST accuracy. lavoisier.vercel.app/sandbox

Education

2018–2019 **MSc Computational Biology**, *Universität Tübingen*

2014–2017 **MSc Pharmaceutical Biotechnology**, *HAW Hamburg*

2011–2014 **BSc Biochemistry and Cell Biology**, *Jacobs University Bremen*

Additional: doctoral research, computational lipidomics, TUM (not completed).

Languages

English Native / Fluent (C2)

German Conversational

resident in Germany since 2011
